Meet Goel

AI & Data Analytics | M.Sc. Data Science (AI and Digital Business)
Erlangen, Germany | +49 1777 883326 | meetgoel12345@gmail.com | linkedin.com/in/meet-goel | meetgoel.github.io

PROFESSIONAL SUMMARY

Data Science M.Sc. candidate and working student at Siemens Healthineers, building AI agents and SQL-backed data applications in a regulated healthcare environment. Applies machine learning, deep learning, and NLP in Python, with hands-on LLM evaluation, robustness testing, and LIME interpretability for trustworthy AI. Experienced with data modeling, data quality controls, and cloud platforms (Microsoft Azure, AWS), taking solutions from requirement and recommendation through to implementation.

PROFESSIONAL EXPERIENCE

Working Student, Service Management and Operations May 2026 – Present
Siemens Healthineers | Erlangen, Germany

- Built the Interface Catalogue, a Power Apps application on a 13-table relational data model in Azure SQL Server, documenting technical interface metadata for Service Management Operations
- Implemented data quality controls in T-SQL stored procedures (existence checks, auto-creation logic, global search), keeping business rules in the governed database layer instead of the app
- Automated bulk data ingestion from Excel with Power Automate and SQL procedures, enabling mass maintenance of interface records
- Contributed to departmental AI enablement by automating communication documentation with Microsoft Copilot Studio and Power Automate

  Technologies: *Azure SQL Server, T-SQL, Power Apps, Power Automate, Microsoft Copilot Studio*

Intern, IT Order-to-Cash Feb 2026 – May 2026
Siemens Healthineers | Erlangen, Germany

- Developed multiple AI agents in Microsoft Copilot Studio as part of departmental AI enablement
- Modeled the IT Order-to-Cash interface architecture in SAP Signavio, giving the department a maintained, visual record of its system interfaces

  Technologies: *Microsoft Copilot Studio, SAP Signavio*

EDUCATION

M.Sc. Data Science (AI and Digital Business, Computer Science) Sep 2024 – Expected 2026
Gisma University of Applied Sciences | Potsdam, Germany

B.C.A. Computer Applications July 2021 – July 2024
IMS Ghaziabad (University Courses Campus) | Ghaziabad, Uttar Pradesh, India

- Winter Training Program in Full Stack Development, IIT Kanpur

TECHNICAL SKILLS

AI & Machine Learning: Machine Learning, Deep Learning, NLP, Generative AI, LLM prompting and evaluation, Trustworthy AI (LIME interpretability, robustness testing), Hugging Face Transformers, scikit-learn, AI agents (Microsoft Copilot Studio)
Data Management & Analytics: Python, SQL, T-SQL (stored procedures), relational data modeling, data quality and governance, data ingestion (Power Automate), Power BI, Excel
Cloud & Platforms: Microsoft Azure (Azure SQL Server), AWS (EC2), Docker, SAP Signavio, Power Apps, Power Automate
Languages: English (professional working proficiency), German (limited working proficiency)

PROJECTS

Master's Thesis: Cross-Lingual Offensive Language Detection in Dravidian Languages 2026 – Present

- Built a Python NLP experiment pipeline measuring cross-lingual transfer from HASOC to DravidianCodeMix (Tamil, Malayalam, Kannada) across zero-shot, few-shot (50, 100, 500 examples), and monolingual baselines
- Benchmarked fine-tuned deep learning models against LLM in-context prompting (Qwen2.5-1.5B-Instruct) on code-mixed, low-resource text
- Assessed model trustworthiness with multi-seed robustness sweeps and LIME interpretability analysis of classifier decisions

  Technologies: *Python, Hugging Face Transformers, LIME*

CINEMATE: Movie Recommendation System Oct 2025 – Nov 2025

- Built a content-based NLP recommender on the TMDB dataset using TF-IDF vectorization and a similarity matrix, deployed on AWS EC2 with a custom CSS web interface

  Technologies: *Python, scikit-learn, AWS EC2*
